

AFRICAN HEALTH AWARENESS & TRADITIONAL HERBAL REMEDIES

WEDNESDAY 17TH OCTOBER 2001

Calabash Centre, 26 George Lane, Catford, London, SE6

7 - 9.30

Professor Charles Ssali is a medical doctor and researcher in traditional African and Western herbal medicines. He produced the *Mariandina* pills, a herbal nutritional booster which rebuilds the immune system to fight diseases including many that disproportionately afflict the African communities - diabetes, eczema & sickle cell.

Drawing on a lifetime's research and development, Professor Ssali will talk about:

- the healing power of herbs,
- expose what people don't know about the causes of disease,
- pros and cons of vaccinations and
- expose the AIDS conspiracy.

This discussion forum is a must for all people of African descent who have an interest in being better informed about maintaining good health and using appropriate natural herbal remedies.
